## **COMMENTS**

### ***Reasons For Allowance***

The following is an examiner's statement of reasons for allowance: the independent claim defines a sewing machine needle comprising a blade which includes a needle point and has a needle eye formed at a portion thereof in the vicinity to said needle point. The needle comprises at predetermined lengths, respectively, a straight profile, a flat cross-section and a circle. The straight profile extends parallel to the axis of the needle from the eye to the point. The flat cross-section is located from the straight portion to the needle point and the perfect circle is located from the flat cross-section to the needle point. The dependent claim further limits the structure of the needle of the independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Pertinent Citations***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Iwashita illustrates a needle including a width S at The needle eye less then the width H of the needle. Vornholt illustrates a needle including a more circular portion from the eye to the needle point. Wohnhas et al., and Bretshneider Illustrate needles including a circle towards the point of the needle and a square cross-section at the eye.
